SITE REPORTS

Northern Region:

Kara Mannix, High School Principal

Site Administrator for Monterey Bay, North Bay, and Northern California

We are well into the semester- wrapping up the first quarter of Project Success, meeting with many families through our, “Progress Monitoring Meeting” processes, and working hard to ensure every student will have a successful outcome this semester. This time of year can get quite busy as we approach various vacations, so our staff is working diligently to stay ahead of everything. We had great success with our fall festivals, and it is always wonderful to see our families in person.

Central Region:

Marcus White, Elementary Principal

Site Administrator for Central Valley and Central Coast

Greetings From Elementary,

This is an exciting time. We are settling in and really focusing on helping our students find success. We have gathered our initial student data. Our teams have analyzed the data and are now utilizing it to drive student achievement. Our focus has been on consistently providing meaningful LiveClass lessons. Our teams continue to dialogue about what is working effectively and how to leverage these techniques. Everyone is excited about our upcoming Fall Break.

**Southern Region:
Heather Tamayo, Middle School Principal
Site Administrator of Southern California**

As October wraps up, we reflect on the relationships that we have built and our drive to understand the students that we serve. Our attention has shifted toward the work that we must do to support our struggling students, and those that would benefit from additional practice. Our middle school staff has recently been trained on a resource that is new to us- IXL. We believe this to be an outstanding resource for all levels of support that are needed, and look forward to bringing this tool to our students. Not only does this address math and language arts, but science and social studies as well.

AB 1604 - Charter School Facility Grant Program

On October 7, 2023 Governor Newsom vetoed AB 1604. The following are a few excerpts from his [Veto Letter](#).

“This bill would make changes to the Charter School Facility Grant program (CSFGP) administered by the California School Finance Authority (CSFA) with regard to required admissions preferences, requirements for related parties, declaring nonprofit status, and how charter school properties are sold and leased. “
“Unfortunately, provisions of this bill could have unintended consequences, including increasing facility costs or limiting financing options for charter schools.

Furthermore, the potential benefits of the bill are limited and do not outweigh the potential risks to charter school facilities. Finally, while the report did find areas for improved transparency, those areas can and should be addressed administratively by the CSFA through the regulatory process rather than by legislation.”

CA State Board of Education

[California State Board of Education is meeting Nov. 8 and 9, 2023](#)

1. The Board will hear results of the Smarter Balance for English Language Arts (ELA) and Math; California Science Test; California Alternate Assessments for ELA, Mathematics, and Science; and California Spanish Assessment.

- The proportion of students tested who are socioeconomically disadvantaged increased from 60 percent in 2022 to 63 percent in 2023, and the number and share of students who are experiencing homelessness or who are part of the foster care system has also increased. Given the ongoing drops in achievement appearing on many national tests and the relationship between student advantage and achievement, California’s statewide scores are promising.
- Overall, against this backdrop, the percentages of California students meeting or exceeding the standards for mathematics and science increased, while the percentage of students meeting or exceeding the standard for ELA did not change significantly.

2. Updates to the 2024-25 Local Control & Accountability Plan Template as [outlined here](#). Two statewide webinar training will be conducted between Nov. 14, 2023 and Jan. 9, 2024. In addition, the [Performance Standards of Local Indicators](#) within the California School Dashboard are revised to include

more information on the process of LCAP adoption during the CalOPS Board meeting when the LCAP is adopted.

II. Oral Reports

A. Superintendent's Report

R. Savage thanks everyone for attendance. He notes CalOPS enrollment population is at 8931, but fluctuating every day.

Staffing updates include the Enrollment team is fully staffed. Also hired new Director of HR to support Steve. General onboarding of new employees in order to lighten the load through the upcoming transition.

SoCal Fall Festival occurred last week and had great energy. Great turnout in regards to attendance. Handed out new CalOPS gear, and the branding change was extremely well received. J. Colombero did great job to get branded swag.

A very successful School Advisory Council meeting was put on by team of assistant principals.

Sponsoring District Updates: 3 concurrent renewals this year. Had our public hearing on Sept. 26 with Scotts Valley and will be headed back on Oct. 24th for the Board vote on renewal. Finally got ahold of Middletown and we have a public hearing with them on Oct 11 and Board vote on Nov 8. Our official petition for Ripon will be submitted on Oct. 10, the public hearing is TBD (Nov. 13 or Dec. 11) and that potential Board vote on Jan 18th. Healthy relationships with all these Sponsoring Districts. Had our oversight visit with Cuyama virtually and it went very well. Having oversight visit with CAPO on Nov. 1st and

in person for our CAPO office, great opportunity to meet and introduce ourselves to new Superintendent. Alpaugh Unified has no updates as of now.

B. Principals' Report (attached)

M. White echoed R. Savage's sentiments on the success of the SoCal Fall Festival. Thanks H. Tamayo for her efforts. The elementary team is settling in a bit, but it is still a busy time with lots of interest in the online platform. Diagnostics are completed, so we are getting to know students academically as well.

H. Tamayo notes that the festival was amazing as always. It looked stunning and parents and kids had a great time! MS is also wrapping up diagnostics and getting them moved into tiered interventions to get the supports they need.

K. Mannix echoes sentiments with the success of the SoCal Fall Festival. The high school team is trying to encourage more interaction with family by extending Welcome Calls to encompass the first month of school, now calling it the Welcome Journal. They are working on getting students on camera, have students and teachers sharing screens, overall more interaction!

C. Charter Impact Financial Report for CalOPS

M. Percin shares his screen so he can go through the attached presentations slide by slide.

These slides cover financials through August. First slide gives highlights. Second slide covers attendance data and metrics, currently showing forecast but will have more data in future. Forecasted and original budget will be compared in future. Third slide covers revenue and in future will show year to date numbers as compared to planned and reforecasted annual numbers. Fourth slide shows expenses and includes the same year to date expenditures versus the forecasted expenditures. Fifth slide covers Fund Balance, always looked at on an annual scale. Sixth slide shows cash balance and currently looks good. Seventh slide shows compliance reporting. Eighth slide gives appendix for extra info and the check register will be included there for review. He also reviews the first slide of each attachment which gives best overview per school.

J. Sitomer notes we are very early in the year and will have better information soon. Offers to customize the presentations based on what the Board wants to see and just wants to ensure transparency.

D. Policy, Compliance, and State Accountability Report

D. Hertzler offers update noting there is a lot on Governor Newsoms desk right now waiting for approval or denial. Currently not much that can affect us due to our being an online Charter. One policy relevant for us to do with facilities and facility funding, but no outcome yet.

We have a large consent agenda this month due to policy updates. D. Hertzler is currently working with YMC law firm to audit our policies and we also have Federal

Program Monitoring occurring that are asking for policy changes. We are adding updated and new policies to our consent agenda for approval to ensure compliance. Finally, working closely with Authorizing Districts to perfect proposal language to send up to Board for Charter Renewals. Smooth processes expected.

Introduction

We're excited you're considering partnering with Discovery Education to support continuity of learning for your students in and out of the classroom. We share your passion for promoting a culture of innovation, collaboration, and academic excellence, and we look forward to working with you to build an effective partnership that empowers every educator and supports the success of every learner with Discovery Education.

We're fully committed to helping leaders, schools, and teachers as they rise to meet new challenges and strive to maintain continuous learning, which includes enriching instruction, increasing engagement, and ensuring equitable access for *all* learners in all circumstances.

The following proposal shares the details of our specific strategy, and we look forward to the opportunity to work as your partner and accomplish these goals together.

About Discovery Education

Discovery Education is the worldwide edtech leader whose state-of-the-art digital platform supports learning wherever it takes place. Through our award-winning multimedia content, instructional supports, and innovative classroom tools, we are able to partner with districts, states and like-minded organizations to transform teaching and learning, empower educators with customized solutions, provide critical supports for our most vulnerable students, and create immersive equitable learning experiences to connect all students to the real world and position them for future success.

Partnership Goals

Through implementation of this partnership plan, Discovery Education will support the California Online Public School's articulated goals of:

- **Equitable Student-Centered Offerings**
 - Provide a robust collection of high-quality, standards-aligned K-12 curricular resources spanning all subjects, grades, and interests.
 - Offer resources to promote literacy development by developing students' funds of knowledge.
 - Scalability to help educators reach all learners in any environment.
 - Support social-emotional learning (SEL) by providing tools and resources that promote the healthy well-being, mentally and physically, of all students.
 - Extend support for vulnerable populations such as English Language Learners (ELL) and Special Education students.
 - Provide resources for families, parents, and guardians to ensure engaging opportunities at home that are both intuitive and relevant.
- **Building Educator Capacity and Confidence**
 - Empower educators and leaders with instructional strategies, tools and resources to support their continuity of learning plans.
 - Develop educator capacity to provide effective teaching and learning in any environment (in-person, remote, and hybrid).
 - Provide tailored professional learning opportunities to meet varying needs and capabilities.
- **Infrastructure Integration**

Comprehensive Support and Improvement

An LEA with a school or schools eligible for comprehensive support and improvement must respond to the following prompts.

Schools Identified

A list of the schools in the LEA that are eligible for comprehensive support and improvement.

California Connections Academy North Bay

Support for Identified Schools

A description of how the LEA has or will support its eligible schools in developing comprehensive support and improvement plans.

Needs Assessment:

Our 2021 graduation rate is above the ESSA defined threshold of 68%. As an organization, we are dedicated to maintaining and improving on this graduation rate going forward. In order to complete the following plan several groups were consulted, including but not limited to: school wide leadership, high school specific leadership, counseling leadership, student services leadership, and community and parents through our School Advisory Committee. These groups were consulted at regular intervals throughout the school year in order for all voices to be heard in the decision making process. During these meetings, stakeholders were involved in all elements of the CSI plan by providing insight, input, and decision making. School Advisory Committee input reinforced the continuation of the in house summer school program. High school specific leadership input reinforced the work done to increase student to teacher contact rates.

The annual planning cycle starts each year in the spring (April/May) for the school year to come. The following is a sample of the data analyzed.

As reported by the California Dashboard, in 2021 the all students graduation rate was 60%, which did not meet the 68% threshold set forth by the State. The lowest group was the Socioeconomically Disadvantaged group at 27.8% and the highest was the White group at 57.9%. In 2022, the all students graduation rate increased to 77.8% which is well above the 68% threshold. The lowest group remains the Socioeconomically Disadvantaged student group but with an increase to 77.3% and the highest was the White student group with an increase to 92.3%. While this increase in graduation rate is encouraging, we are dedicated as an organization to continuing our efforts toward making significant annual progress.

Currently, the school tracks the change in the percent of students on track for graduation. In 2021-2022 9th graders dropped to 96.7% on track for graduation after the conclusion of the first semester. In 2022-2023, 82.3% of 9th graders remained on track at the conclusion of the first semester, a decrease when compared to the prior year. This percentage of 9th grade students falling off cohort so early is directly contributing to our low graduation rate and must continue to be addressed.

As an educational organization focused on continuous improvement, interventions to address graduation rate have begun prior to being identified as CSI. These two interventions are the transition to a homeroom model and the conceptualization and implementation of the credit recovery program known as Project Success. The results of both programs are encouraging. As a result of the homeroom model, students have received an increase in successful contacts from staff. An increase in successful contacts relates to an increase of active engagement with our school program. Throughout the 2021-2022 school year, high school students received biweekly successful contacts (i.e. phone call, small group lesson) at a rate of 92.1% as the year progressed. This has increased to 98.8% in the 2022-2023 school year. Being fully aware of the realities of graduation rate, the high school staff has also begun the implementation of an internal credit recovery program called Project Success. During the 2021-2022 school year, historically at-risk high school students passed an average of 93% of their classes in the Project Success program. During the 2022-2023 school year, the average pass rate has increased to 96%. These successes are providing the justification and motivation to continue and expand these programs.

As a result of the school's struggles with graduation rate and the potential for learning loss due to the pandemic, our school ran its own in house summer school program that began the summer of 2020. This was the first in its history. Prior to the summer of 2020, credit deficient high school students were sent to a third party program with a success rate of an average of around 50% pass rates. Summer of 2020, we had a 77% pass rate and an 85% summer graduation rate for those in their last year of high school. Summer of 2021, our course pass rate decreased to 72% and our summer graduation

rate increased to 96% for those in their last year of high school. In the summer of 2022, our course pass rate increased to 85%, while our graduation rate decreased slightly to 87.5%. These numbers show the benefit of our in-house summer school program in improving our overall graduation rate.

Root Cause Analysis:

- A graduation rate below 68% for some of our student groups needs to be addressed
- Too many students are falling off cohort early in high school, including the 9th grade year, contributing to the decline in 4 year cohort graduation success.
- A high mobility rate is contributing to a large number of students enrolling deficient in credits.

Evidence-Based Interventions:

In order to make the best plan to meet our students' diverse needs, we utilized an evidenced based decision making process with stakeholders. In this case "The Practical Decision Maker" (Harvey, Bearley, Corkrum, 1997) was consulted. In order to choose our evidenced based interventions, we required the solution criteria be a strategy that can contribute to achieving a 68% graduation rate or higher. The possible solutions, i.e. the possible evidence based interventions were all the interventions listed below. As we identified our solution choices we decided to use all interventions considered being that the needs of the students varied greatly. As a result of this needs assessment, root cause analysis, and decision making process, the following evidence based interventions will be implemented and/or continued:

-Early Warning and Response System: The Everyone Graduates Center at the Johns Hopkins University's School of Education (<http://new.every1graduates.org/>), describes tools and models to help schools increase graduation rates, among these is the Early Warning and Response System. "Early warning systems use readily available data to alert teachers and administrators to students who are on the pathway to dropping out." Based on the school's numbers of students falling off cohort as early as the 9th grade, the school will formally implement such a system. Implementation of this system involves:

1. Assembling longitudinal data for individual students on a) graduation status and b) potential predictors of dropout, such as student attendance, behavior, grades, and test scores;
2. Identifying the threshold level of each predictor that gives students a high probability of dropping out; and
3. Checking that the predictors identify a high percentage of the students in that district who dropout of school.

(<http://new.every1graduates.org/tools-and-models/early-warning-and-response-systems/>)

-Homeroom Model: Based on the encouraging initial results of the increase in engagement metrics, the school will continue the implementation and refinement of the homeroom model. The homeroom model in the virtual setting looks very similar in a traditional brick and mortar setting. Students are assigned in small groups to specific teachers, these teachers may or may not teach them an academic subject. It is all teachers' responsibility to track and assist all their students, except that this burden is increased for the students in their homeroom with the overall outcome of deeper and more authentic relationships with the students and their families.

-High School Credit Recovery Program (Project Success): Another layer of the homeroom model is the high school credit recovery program known as Project Success. Within this program, credit deficient students are clustered within a specific homeroom. Homeroom teachers are strategically selected from the four core subject areas and electives in order to accelerate the credit recovery of the school's students most at risk of not graduating on time.

- CHAMPS program: Community Helps Achieve My Personal Success (CHAMPS) is a program implemented in 2021 to identify students who are either credit deficient, taking additional courses, or have shown a propensity to struggle academically. CHAMPS students have a history of struggling academically and are 1 or more credits behind. This program offers support to students in grades 9-12 by providing them with additional homeroom support and guidance.

-College and Career Access Pathway (CCAP): According to <http://cacareerpathways.clasp.org>, "this joint initiative of the California Community Colleges Chancellor's Office and the California Department of Education allows high school students to dual enroll in up to 15 community college units per term; students may enroll in no more than four courses per term. Program goals are to develop seamless pathways from high school to community college for career technical education (CTE) or general education transfer, improve high school graduation rates, or help high school students achieve college and career readiness." We have partnered with Saddleback Community College for this program. In the 2021-2022 school year, its first full year of program implementation, we had 38 students enrolled. These students were provided up to three courses during this time and achieved a 78% pass rate. This has been a success and we look forward to program growth in its second year of implementation.

-In House Summer School: Building off the success of the 2020 and 2021 programs, we continue to refine our summer school program. In the summer of 2022 we saw a

Summer School pass rate of 87.5%. We will continue to work to better identify the students in need of summer school. We will also work to refine course offerings. Summer school will focus on both higher grade students needing credits and lower grade students needing foundational skills.

Identification of Resource Inequities:

The mission of California Connections Academy North Bay seeks to provide “a more personalized approach to learning to maximize these students’ potential and meet the highest performance standards.” In this case, students not achieving the basic requirement for a high school diploma are not “meeting the highest performance standards.” Resource inequities may therefore be another contributor to this reality. To begin this process of identifying resource inequities, we assessed the fairness of our efforts. As stated in the Needs Assessment, some student groups are exceeding the 67% graduation rate threshold. Improvement is still needed. Students of all groups are still missing the target for graduation, which is why improvement in this area is so important, but this fact also implies that there is fairness in the implementation of our program, so that one student group is not succeeding at the expense of other groups. In an online school, all students receive the same access to all courses, the same materials, and the same level of teacher support and are held to the same standards of success. We plan to not only continue this fair implementation of our program but to also continue to push for improvement of student graduation outcomes. Therefore, all students in need of support to get back on track for graduation will be included in all our efforts. This includes the Project Success credit recovery program, CHAMPS program, and the early warning and response system monitoring and support. The only metric used for identification for eligibility into these support programs will be the level of credit deficiency. We do believe that all students at risk of not graduating on time need additional school resources over and above what each student in our program normally receives in order to “catch up” to their ‘on track’ peers, and we will allocate additional resources. As a result, we plan to lower student to teacher ratios for those at greatest risk of not graduating through the combined efforts of the homeroom model and the Project Success credit recovery program. Also, material and human resources will be allocated to the continuation of the college and career access pathway, the early warning and response system, CHAMPS, and in-house summer school.

Monitoring and Evaluating Effectiveness

A description of how the LEA will monitor and evaluate the plan to support student and school improvement.

The CSI plan will be monitored following the stages of implementation described by Fixsen, "exploration, installation, initial implementation, and full implementation; the stages are dynamic within organizations such as schools and clinics, moving back and forth among stages as personnel and circumstances change." (<https://nirn.fpg.unc.edu/>) The plan will be monitored at all times, with formal quarterly reports on the following data points:

- The percentage of all students who are on track to graduate, with the goal of all those in the current 4 year cohort to be above 68%.
- The percentage of underclassmen remaining on cohort to increase, i.e. more than 82.3% of 9th grade students to remain on track after the first semester of the 2023-2024 school year.
- Continue with CCAP Program that was implemented in the Fall of the 2021-2022 school year.
- In house summer school program refinement.
- Continued refinement of CHAMPS program.

We will progress monitor these data points, at a minimum quarterly. School leadership, staff, and community will be included in these progress monitoring sessions. All feedback will be considered for further programmatic refinements. All of these efforts will help the school determine the effectiveness of the selected evidence based interventions and this feedback and data will be utilized in future evidenced based decision making.
